

TERRAPROTETTA

Our terroir

PIEDMONT

1- Calamandrana

(Barbera Superiore, Barbera Nizza)

2- Loazzolo

(Moscato, Brachetto, Pinot Noir, Sauvignon, Chardonnay)

Wide wine range with different and remarkable personality, due to two big terroir

-Loazzolo (extremely fine) -Calamandrana (big structure)

Three Big Wines, the maximum terroir expression:

- Pinot Nero, from a vineyard with 11.000 vines per hectare.
- Nizza DOCG , competes whit the big Barberas.
- Moscato d'Asti DOCG Canelli, among the best Moscato on the market.

Piemonte D.O.C. Pinot Nero

THE TERROIR INFLUENCE ON WINE:

Loazzolo is located in a microclimate whose conditions are particularly favorable for growing Pinot Nero. The altitude, sun exposure (specifically fresher verses east and west), the temperature range, the poor soil and calcium all ever changing due to the vintage and climate conditions, are all conditions that help to enrich Pinot Nero, forcing us to constantly seek out the right equilibrium between acidity and tannins, and slowing the maturation to bring forth its natural perfumes.

VINEYARDS

6000 vines per hectare first vineyard

11000 vines per hectare second vineyard "La vela"

AVERAGE VINE AGE

15 years

ASPECT

East, West

GRAPE VARIETY

Product of 100% estate grown Pinot Nero.

AGING

18/24 months in barriques / tonneaux at second and third passage, followed by 18 months in bottle.

"An extreme experimentation to find the right balance between tannins and acid, extolling the aromas".

Loazzolo D.O.C.

Vendemmia tardiva

THE TERROIR INFLUENCE ON WINE:

Fresh and well-balanced taste accompanied by an irrepressible aromatic elegance of citrus fruits, sage and yellow flowers, the product of sloping terrain and well-aged Moscato di Loazzolo vineyards.

DENSITY

7000 vines per ha.

AVERAGE VINE AGE

70 years

ASPECT

Southeast, South, Southwest

GRAPE VARIETY

Moscato Bianco 100%

YIELD

5 tonnes per ha.

AGING

12 months in barriques, steel 24, 24 in the bottle

"It is the smallest DOC in Italy, Loazzolo wine's symbol."

Moscato d'Asti D.O.C.G.

Canelli

THE TERROIR INFLUENCE ON WINE:

An intense bouquet combined with an elegantly balanced sweet, mineral and fresh taste, the result of a later optimum ripening that best conserves and develops the bouquet, preserving the acidity.

DENSITY

6500 vines per ha.

AVERAGE VINE AGE

60 years

ASPECT

Southeast, South, Southwest

GRAPE VARIETY

Moscato Bianco 100 %

"The most awarded company Moscato, known for the intensity of its perfumes"

Monferrato bianco D.O.C. Cardonnay

THE TERROIR INFLUENCE ON WINE:

Freshness and minerality in taste are accompanied by an intense white flower bouquet, which fully express the Chardonnay characteristics. The vine are grown above 500m asl. High hill Chardonnay has minerality and elegance as its main features.

DENSITY

6000 vines per ha.

AVERAGE VINE AGE

10 years

ASPECT

East-South-West

UVE IMPIEGATE

100% Chardonnay.

AGING

10 months in barriques washed with steam, subsequently 6 months battonage followed by 12 months in bottle.

“High hills Chardonnay has minerality and elegance as its main features.”

Piemonte D.O.C. Sauvignon Blanc

THE TERROIR INFLUENCE ON WINE:

A fresh and mineral taste accompanied by an intense bouquet of white and exotic flowers fully express the Sauvignon blanc characteristics. The vines are at the highest point of the estate vineyard, cultivated at 540 meters above sea level, which renders a stronger thermal range in August and September.

DENSITY

5000 vines per hectare

AVERAGE VINE AGE

10 years

ASPECT

South- West

GRAPE VARIETY

100% Sauvignon Blanc

“Freshness and minerality due to its growing zone at 500m asl”

Monferrato Rosso D.O.C.

THE TERROIR INFLUENCE ON WINE:

An elegant and easy wine made from a blend of Barbera, Nebbiolo and Dolcetto from Loazzolo grapes.

DENSITY

6000 vines per ha

AVERAGE VINE AGE

30 years

ASPECT

AGING

24 months in barriques / barrels followed by 12 months of aging in bottle

"Wine born from Barbera grapes assembly with the international grapes selection grown in farm."

Vineyards protection with a slope more than 50%

typical feature of Loazzolo where you get up to 80%!

Without man work these lands would have abandoned with considerable landscape damage.

Our project is included in the new Suri vineyards selection operated by the Moscato d'Asti Consortium.

Loazzolo ecosystem preservation

CO2 compensation: we measure it through the woods that naturally

coexist with vineyard, we are in credit after the calculation of CO2 production concerning wine delivered from wheel transport. We do not use chemical herbicides

The heroic experiment

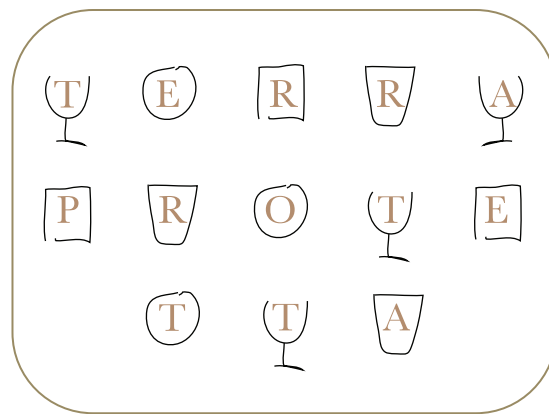

In our vineyards find space acclimated grapes such as Pinot and Cabernet.

In 2007 we planted “la Vela” (translated “the Wing”) a Pinot Nero vineyard considered unique for extreme characteristics in slope terms and % of vines per hectare (over 11.000).

An intensity that reduce the green part and concentrate in the grape all essences.
